

CMS Telescoping Swivel Joint

The CMS Telescoping Swivel Joint is designed for use in multi string packer completions to facilitate their assembly. It allows easy makeup of the tubing by allowing both rotation and telescoping of its top and bottom sub relative to each other. The standard tool can telescope up to 24 inches, but it can be furnished in various lengths, upon request to suit specific completion requirements.

Features and Benefits

- Available in N-80 or L-80 material as standard, premium materials supplied on request
- Available with API threads as standard but premium threads can be provided as needed
- Nitrile seals are supplied as standard but premium seals are available as required
- Standard telescoping length is 24 inches
